Simple Attention	40	107	68	Yes		X			
Motor Speed	129	119	90	Yes	X				

Domain Dashboard: Above average domain scores indicate a standard score (SS) greater than 109 or a Percentile Rank (PR) greater than 74, indicating a high functioning test subject. Average is a SS 90-109 or PR 25-74, indicating normal function. Low Average is a SS 80-89 or PR 9-24 indicating a slight deficit or impairment. Below Average is a SS 70-79 or PR 2-8, indicating a moderate level of deficit or impairment. Very Low is a SS less than 70 or a PR less than 2, indicating a deficit and impairment. Reaction times are in milliseconds. An \* denotes that "lower is better", otherwise higher scores are better. Subject Scores are raw scores calculations generated from data values of the individual subtests.

VI\*\* - Validity Indicator: Denotes a guideline for representing the possibility of an invalid test or domain score. "No" means a clinician should evaluate whether or not the test subject understood the test, put forth their best effort, or has a clinical condition requiring further evaluation.

Verbal Memory Test (VBM)	Score	Standard	Percentile	
Correct Hits - Immediate	13	104	61	Verbal Memory test: Subjects have to remember 15 words and recognize them in a field of 15 distractors. The test is repeated at the end of the battery. The VBM test measures how well a subject can recognize, remember, and retrieve words e.g. exploit or attend literal representations or attribute. "Correct Hits" refers to the number of target words recognized. Low scores indicate verbal memory impairment.
Correct Passes - Immediate	15	110	75	
Correct Hits - Delay	11	99	47	
Correct Passes - Delay	15	110	75	
Visual Memory Test (VSM)	Score	Standard	Percentile	
Correct Hits - Immediate	10	85	16	Visual Memory test: Subjects have to remember 15 geometric figures, and recognize them in a field of 15 distractors. The test is repeated at the end of the battery. The VSM test measures how well a subject can recognize, remember, and retrieve geometric figures e.g. exploit or attend symbolic or spatial representations. "Correct Hits" refers to the number of target figures recognized. Low scores indicate visual memory impairment.
Correct Passes - Immediate	11	98	45	
Correct Hits - Delay	8	80	9	
Correct Passes - Delay	13	113	81	
Finger Tapping Test (FTT)	Score	Standard	Percentile	
Right Taps Average	67	120	91	The FTT is a test of motor speed and fine motor control ability. There are three rounds of tapping with each hand. The FTT test measures the speed and the number of finger-taps with each hand. Low scores indicate motor slowing. Speed of manual motor activity varies with handedness. Most people are faster with their preferred hand but not always.
Left Taps Average	62	114	82

Symbol Digit Coding (SDC)	Score	Standard	Percentile	
Correct Responses	49	97	42	The SDC test measures speed of processing and draw upon several cognitive processes simultaneously, such as visual scanning, visual perception, visual memory, and motor functions. Errors may be due to impulsive responding, misperception, or confusion.
Errors*	0	110	75	
Stroop Test (ST)	Score	Standard	Percentile	
Simple Reaction Time*	327	97	42	The ST measures simple and complex reaction time, inhibition / disinhibition, mental flexibility or directed attention. The ST helps assess how well a subject is able to adapt to rapidly changing and increasingly complex set of directions. Prolonged reaction times indicate cognitive slowing / impairment. Errors may be due to impulsive responding, misperception, or confusion.
Complex Reaction Time Correct*	624	98	45	
Stroop Reaction Time Correct*	737	99	47	
Stroop Commission Errors*	1	98	45	
Shifting Attention Test (SAT)	Score	Standard	Percentile	
Correct Responses	49	98	45	The SAT measures executive function or how well a subject recognizes set shifting (mental flexibility) and abstraction (rules, categories) and manages multiple tasks simultaneously. Subjects have to adjust their responses to randomly changing rules. The best scores are high correct responses, few errors and a short reaction time. Normal subjects may be slow but accurate, or fast but not so accurate. Attention deficit may be apparent.
Errors*	0	119	90	
Correct Reaction Time*	1165	96	40	
Continuous Performance Test (CPT)	Score	Standard	Percentile	
Correct Responses	40	103	58	The CPT measures sustained attention or vigilance and choice reaction time. Most normal subjects obtain near-perfect scores on this test. A long response time may suggest cognitive slowing and/or impairment. More than 2 errors (total) may be clinically significant. More than 4 errors (total) indicate attentional dysfunction.
Omission Errors*	0	103	58	
Commission Errors*	0	107	68	
Choice Reaction Time Correct*	452	93	32	
Reasoning Test (RT)	Score	Standard	Percentile	
Correct Responses	12	116	86	The NVRT measures how well a subject can perceive and understand the meaning of visual or abstract information and recognizing relationships between visual-abstract concepts. The NVRT is comprised of 15 matrices, or visual analogies. The matrices are progressively more difficult. Each is presented for 14.5 seconds. Non-verbal or visual-abstract reasoning is the process of perceiving issues and reaching conclusions through the use of symbols or generalizations rather than concrete factual information.
Average Correct Reaction Time*	5063	100	50	
Commission Errors*	2	113	81	
Omission Errors*	1	104	61

Four Part Continuous Performance Test	Score	Standard	Percentile	The FPCPT test is a four part test that measures a subject's working memory and sustained attention. The FPCPT is a four part test: PART ONE - is a simple reaction time test, the subject must press the space bar when any stimulus is presented; PART TWO - is a variant of the continuous performance test, the subject is asked to respond to one stimulus, but not to any others. Discrimination is required, so the reaction times that are generated are "choice reaction times". PART THREE - is a "one back" CPT. The subject has to respond to a figure only if the figure immediately preceding was the same. PART FOUR - is a "two-back" CPT. It is a difficult task and is used to measure working memory. Parts two, three, and four of the tests are used to calculate sustained attention domain.

Adult ADHD Self-Report Scale (ASRS-v1.1) Symptom Checklist	
Patient ID: 39381	Test Date: April 27, 2025 21:56:47
Age: 50	Administrator: Lucid Cognition
Total Test Time: 53:24 (min:secs)	Language: English (United Kingdom)
Duration: 2:14 (min:secs)	CNSVS Online Version 2.0.5

The Symptom Checklist is an instrument consisting of the eighteen DSM-IV-TR criteria. Six of the eighteen questions were found to be the most predictive of symptoms consistent with ADHD. These six questions are the basis for the ASRS v1.1 Screener and are also Part A of the Symptom Checklist. Part B of the Symptom Checklist contains the remaining twelve questions.

If four or more marks appear in the darkly shaded boxes within Part A then the patient has symptoms highly consistent with ADHD in adults and further investigation is warranted. The frequency scores on Part B provide additional cues and can serve as further probes into the patient's symptoms. Pay particular attention to marks appearing in the dark shaded boxes. The frequency-based response is more sensitive with certain questions. No total score or diagnostic likelihood is utilized for the twelve questions. It has been found that the six questions in Part A are the most predictive of the disorder and are best for use as a screening instrument.

Part A (questions 1-6)		Never	Rarely	Some times	Often	Very Often
1	How often do you have trouble wrapping up the final details of a project, once the challenging parts have been done?					X
2	How often do you have difficulty getting things in order when you have to do a task that requires organization?					X
3	How often do you have problems remembering appointments or obligations?					X
4	When you have a task that requires a lot of thought, how often do you avoid or delay getting started?					X
5	How often do you fidget or squirm with your hands or feet when you have to sit down for a long time?					X
6	How often do you feel overly active and compelled to do things, like you were driven by a motor?			X		

Part B (questions 7-18)		Never	Rarely	Some times	Often	Very Often
7	How often do you make careless mistakes when you have to work on a boring or difficult project?				X	
8	How often do you have difficulty keeping your attention when you are doing boring or repetitive work?					X
9	How often do you have difficulty concentrating on what people say to you, even when they are speaking to you directly?					X
10	How often do you misplace or have difficulty finding things at home or at work?				X	
11	How often are you distracted by activity or noise around you?					X
12	How often do you leave your seat in meetings or other situations in which you are expected to remain seated?				X	
13	How often do you feel restless or fidgety?					X
14	How often do you have difficulty unwinding and relaxing when you have time to yourself?				X	
15	How often do you find yourself talking too much when you are in social situations?				X	
16	When you're in a conversation, how often do you find yourself finishing the sentences of the people you are talking to, before they can finish them themselves?			X		
17	How often do you have difficulty waiting your turn in situations when taking turns is required?			X		
18	How often do you interrupt others when they are busy?			X		

The Adult ADHD Self-Report Scale (ASRS) Symptom Checklist and scoring system were developed in conjunction with the World Health Organization (WHO), and the Workgroup on Adult ADHD that included the following team of psychiatrists and researchers: Lenard Adler MD, Associate Professor of Psychiatry and Neurology New York University Medical School; Ronald C. Kessler PhD Professor, Department of Health Care Policy Harvard Medical School; Thomas Spencer MD, Associate Professor of Psychiatry Harvard Medical School.

Epworth Sleepiness Scale (ESS) SF-8	
Patient ID: 39381	Test Date: April 27, 2025 21:56:47
Age: 50	Administrator: Lucid Cognition
Total Test Time: 53:24 (min:secs)	Language: English (United Kingdom)
Duration: 1:30 (min:secs)	CNSVS Online Version 2.0.5

The patient is getting enough sleep if they score 6 or less. Scores of 7 or 8 are average. If the patient's score is 9 or more they should seek the advice of a sleep specialist without delay.

In contrast to feeling just tired, how likely are you to doze off or fall asleep in the following situation?		
1	Sitting and reading	2 - Moderate chance of dozing
2	Watching TV	1 - Slight chance of dozing
3	Sitting inactive in a public place (e.g., a theater or a meeting)	2 - Moderate chance of dozing
4	As a passenger in a car for an hour without a break	2 - Moderate chance of dozing
5	Lying down to rest in the afternoon when circumstances permit	3 - High chance of dozing
6	Sitting and talking to someone	0 - No chance of dozing
7	Sitting quietly after a lunch without alcohol	1 - Slight chance of dozing
8	In a car, while stopped for a few minutes in traffic	0 - No chance of dozing
Epworth Score		11

NeuroPsych Questionnaire (NPQ) LF-207	
Patient ID: 39381	Test Date: April 27, 2025 21:56:47
Age: 50	Administrator: Lucid Cognition
Total Test Time: 53:24 (min:secs)	Language: English (United Kingdom)
Duration: 13:42 (min:secs)	CNSVS Online Version 2.0.5

Domain	Score	Severity	Description
Attention	264	Severe	The Neuropsych Questionnaire asks patients (or an appropriate observer) a series of questions about their clinical state. The questions are about the symptoms of various neuropsychiatric disorders. The terminology is similar to that used in the diagnostic manuals, and in many familiar clinical questionnaires and rating scales; but it has been simplified, and all symptoms are scored on the same metric. Scores are reported on a scale of 0 (not a problem) to 300 (severe). As a rule, scores above 225 indicate a severe problem; scores from 150-224 indicate a moderate problem; and scores from 75-149, a mild problem. A high score on the Neuropsych Questionnaire means that the patient is reporting more symptoms of greater intensity. It doesn't necessarily mean that the patient has a particular condition; just that he or she (or their spouse, parent or caregiver) is saying that they have a lot of intense symptoms. Conversely, a low score simply means that the patient (or caregiver) is not reporting symptoms associated with a particular condition, at least during the period of time specified. It does not mean that the patient does not have the condition. Just as some people over-state their problems, others tend to under-state their problems. The Neuropsych Questionnaire is not a diagnostic instrument. The results it generates are only meant to be interpreted by an experienced clinician in the course of a clinical examination.

Attention Questions		
1	Difficulty concentrating	3 - A severe problem
2	Difficulty paying attention	3 - A severe problem
3	Easily distracted	3 - A severe problem
4	Feeling scattered, disorganized	2 - A moderate problem
5	Forgetful, I need constant reminding	3 - A severe problem
6	Leaving things behind and having to go back to get them.	3 - A severe problem
7	Losing things	3 - A severe problem
8	Making careless mistakes	3 - A severe problem
9	Not finishing chores, homework or projects	3 - A severe problem
10	Short attention span	3 - A severe problem
11	When reading, losing track of what the story is about	0 - Not a problem
Impulsive Questions		
1	Feeling restless	2 - A moderate problem
2	Fidgety, I can't sit still	2 - A moderate problem
3	High energy	0 - Not a problem
4	Impatient	3 - A severe problem
5	Impulsive, act without thinking	0 - Not a problem
6	Overly active	0 - Not a problem

NeuroPsych Questionnaire (NPQ) LF-207

Duration: 13:42 (min:secs)	CNSVS Online Version 2.0.5

Learning Questions		
1	Bad handwriting	1 - A mild problem
2	Having to do things slowly to make sure it's right	3 - A severe problem
3	Learning a foreign language	3 - A severe problem
4	Learning math	1 - A mild problem
5	Learning new things	2 - A moderate problem
6	I don't like to read	0 - Not a problem
7	I don't work up to my potential	3 - A severe problem
8	Organizing studies or projects	3 - A severe problem
9	Paying attention to lectures	3 - A severe problem
10	Remembering what you studied or read	1 - A mild problem
11	Taking notes	3 - A severe problem
12	Taking tests	0 - Not a problem
13	When reading, losing track of what the story is about	0 - Not a problem
Memory Questions		
1	Failing to recognize places you have been before.	1 - A mild problem
2	Finding a television story or a movie hard to follow.	0 - Not a problem
3	Forgetful, I need constant reminding	3 - A severe problem
4	Forgetting appointments or social engagements.	3 - A severe problem
5	Forgetting if you have taken your medicine	2 - A moderate problem
6	Forgetting something cooking on the stove or in the toaster	1 - A mild problem
7	Forgetting to do something you said you would do	3 - A severe problem
8	Forgetting to give a message to someone	3 - A severe problem
9	Forgetting to tell somebody something that you meant to tell them	3 - A severe problem
10	Forgetting where things are kept; looking for them in the wrong place	3 - A severe problem
11	Forgetting where you parked the car	1 - A mild problem
12	Going to the store but forgetting to get what you need	3 - A severe problem
13	I can't remember the names of close relatives or friends.	1 - A mild problem
14	Learning new things	2 - A moderate problem
15	Leaving things behind and having to go back to get them.	3 - A severe problem
16	My mind goes blank	1 - A mild problem
17	Problems with memory	2 - A moderate problem
18	Putting something down and then forgetting where you put it.	3 - A severe problem
19	Reading something and then realizing you have read it before.	1 - A mild problem
20	Trouble thinking of the right word	0 - Not a problem
21	Unable to remember things as well as I used to	2 - A moderate problem
22	When reading, losing track of what the story is about	0 - Not a problem
Anxiety Questions		
1	Feeling anxious	2 - A moderate problem
2	Feeling keyed up or on edge	2 - A moderate problem
3	Feeling nervous	3 - A severe problem
4	Feeling restless	2 - A moderate problem
5	Feeling tense	2 - A moderate problem
6	Fidgety, I can't sit still	2 - A moderate problem
7	Having nightmares or bad dreams	2 - A moderate problem
8	High-strung or keyed up	1 - A mild problem
9	I find it hard to relax	1 - A mild problem
10	Worrying too much	3 - A severe problem
Panic Questions		
1	Attacks of intense anxiety	2 - A moderate problem
2	Feeling so nervous it's hard to breathe	0 - Not a problem
3	Getting so nervous I feel like passing out	1 - A mild problem
4	Getting really scared for no reason at all	1 - A mild problem
5	Panic attacks	2 - A moderate problem
6	Trouble catching my breath	0 - Not a problem

Agoraphobia Questions		
1	Avoiding certain things or places	3 - A severe problem
2	Feeling scared in open spaces or out in public	2 - A moderate problem
3	Feeling scared to use buses or trains	1 - A mild problem
4	Feeling uncomfortable in crowds	3 - A severe problem
5	Feelings of being trapped	2 - A moderate problem
6	Worrying about fainting in public	1 - A mild problem
Obsessions & Compulsions Questions		
1	I hate being touched or held	3 - A severe problem
2	Checking things several times	3 - A severe problem
3	Collecting things that you don't really need	2 - A moderate problem
4	Counting things; numbers going through your mind	3 - A severe problem
5	Eating the same foods all the time	2 - A moderate problem
6	Feeling guilty over minor infractions	3 - A severe problem
7	Having bad thoughts that you can't get rid of	0 - Not a problem
8	Having thoughts or words that go over and over in your mind	3 - A severe problem
9	It bothers me when someone eats off my plate	3 - A severe problem
10	I have a special number that I count up to or do things just that number of times	1 - A mild problem
11	I have to do things a certain number of times before I'm satisfied	3 - A severe problem
12	Moving or talking in special ways to avoid bad luck	2 - A moderate problem
13	Putting things away, and they have to be just right	3 - A severe problem
14	Repetitive behaviors like touching or counting	3 - A severe problem
15	Thoughts about sex that are troubling	0 - Not a problem
16	Trouble making up your mind	3 - A severe problem
17	Washing your hands over and over	1 - A mild problem
18	Worrying about being clean	2 - A moderate problem
19	Worrying about the germs that are on things	1 - A mild problem
Social Anxiety Questions		
1	I am a shy person	3 - A severe problem
2	Difficulty developing friendships	3 - A severe problem
3	Feeling nervous around people I don't know	3 - A severe problem
4	Feeling nervous when I have to do something in front of people	2 - A moderate problem
5	Feeling uneasy about eating or drinking in public	2 - A moderate problem
6	Hard to go out in public	3 - A severe problem
7	Hard to relate to other people	3 - A severe problem
8	Starting a conversation with people I don't know	3 - A severe problem
Depression Questions		
1	Crying spells	0 - Not a problem
2	Feeling depressed	2 - A moderate problem
3	Feeling discouraged about the future	2 - A moderate problem
4	Feeling empty inside	2 - A moderate problem
5	Feeling hopeless	2 - A moderate problem
6	Feeling irritable	2 - A moderate problem
7	Feeling little or no interest in things	2 - A moderate problem
8	Feeling lonely	2 - A moderate problem
9	Feeling sad	2 - A moderate problem
10	Feeling that doing anything is a real effort	3 - A severe problem
11	Feelings of guilt or remorse	2 - A moderate problem
12	Having nightmares or bad dreams	2 - A moderate problem
13	I feel like a failure	2 - A moderate problem
14	I feel like I'm being punished	2 - A moderate problem
15	Loss of interest in sex	2 - A moderate problem
16	Not enjoying things as much as before	3 - A severe problem
17	Withdrawn, isolated	2 - A moderate problem

12	My moods change quickly	1 - A mild problem
13	Temper tantrums	1 - A mild problem
Mania Questions		
1	Much more interested in sex than usual	0 - Not a problem
2	Being much more social or outgoing than usual	0 - Not a problem
3	Decreased need for sleep	0 - Not a problem
4	Feeling much more confident than usual	0 - Not a problem
5	Having much more energy than usual	0 - Not a problem
6	Increased or inappropriate sexual interest	0 - Not a problem
7	Pressured speech, uninterruptible and continuous	1 - A mild problem
8	Thoughts racing	3 - A severe problem
Aggression Questions		
1	Blaming other people for your own mistakes	0 - Not a problem
2	Defiant or argumentative	3 - A severe problem
3	Destructive to property or things	0 - Not a problem
4	Excessive yelling or screaming	0 - Not a problem
5	Getting into fights	1 - A mild problem
6	Having an urge to injure or to hurt someone	0 - Not a problem
7	Having the urge to destroy things	0 - Not a problem
8	Hostile	1 - A mild problem
9	In trouble with the law	0 - Not a problem
10	Physical aggression toward others	0 - Not a problem
Psychotic Questions		
1	I feel nervous when people watch me or talk about me	3 - A severe problem
2	Feeling paranoid	0 - Not a problem
3	I feel that other people are watching or talking about me	2 - A moderate problem
4	I feel that someone else can control my mind	0 - Not a problem
5	I feel that I can't trust other people	2 - A moderate problem
6	I feel I am being watched	2 - A moderate problem
7	I hear voices that no one else can hear	0 - Not a problem
8	I can't think straight	2 - A moderate problem
9	My mind is full of terrifying thoughts or images	0 - Not a problem
10	Other people know my private thoughts	0 - Not a problem
11	Overly suspicious	1 - A mild problem
12	Peculiar or bizarre behavior	1 - A mild problem
13	Seeing things that other people don't see	2 - A moderate problem
14	I can't feel close to another person	0 - Not a problem
