Sustained Attention	31	103	58	Yes		X			
Simple Attention	36	61	1	Yes					X
Motor Speed	133	113	81	Yes	X				

Domain Dashboard: Above average domain scores indicate a standard score (SS) greater than 109 or a Percentile Rank (PR) greater than 74, indicating a high functioning test subject. Average is a SS 90-109 or PR 25-74, indicating normal function. Low Average is a SS 80-89 or PR 9-24 indicating a slight deficit or impairment. Below Average is a SS 70-79 or PR 2-8, indicating a moderate level of deficit or impairment. Very Low is a SS less than 70 or a PR less than 2, indicating a deficit and impairment. Reaction times are in milliseconds. An * denotes that "lower is better", otherwise higher scores are better. Subject Scores are raw scores calculations generated from data values of the individual subtests.

VI** - Validity Indicator: Denotes a guideline for representing the possibility of an invalid test or domain score. "No" means a clinician should evaluate whether or not the test subject understood the test, put forth their best effort, or has a clinical condition requiring further evaluation.

Verbal Memory Test (VBM)	Score	Standard	Percentile	
Correct Hits - Immediate	15	118	88	Verbal Memory test: Subjects have to remember 15 words and recognize them in a field of 15 distractors. The test is repeated at the end of the battery. The VBM test measures how well a subject can recognize, remember, and retrieve words e.g. exploit or attend literal representations or attribute. "Correct Hits" refers to the number of target words recognized. Low scores indicate verbal memory impairment.
Correct Passes - Immediate	14	95	37	
Correct Hits - Delay	10	91	27	
Correct Passes - Delay	15	109	73	
Visual Memory Test (VSM)	Score	Standard	Percentile	
Correct Hits - Immediate	11	89	23	Visual Memory test: Subjects have to remember 15 geometric figures, and recognize them in a field of 15 distractors. The test is repeated at the end of the battery. The VSM test measures how well a subject can recognize, remember, and retrieve geometric figures e.g. exploit or attend symbolic or spatial representations. "Correct Hits" refers to the number of target figures recognized. Low scores indicate visual memory impairment.
Correct Passes - Immediate	12	101	53	
Correct Hits - Delay	9	86	18	
Correct Passes - Delay	13	106	66	
Finger Tapping Test (FTT)	Score	Standard	Percentile	
Right Taps Average	66	108	70	The FTT is a test of motor speed and fine motor control ability. There are three rounds of tapping with each hand. The FTT test measures the speed and the number of finger-taps with each hand. Low scores indicate motor slowing. Speed of manual motor activity varies with handedness. Most people are faster with their preferred hand but not always.
Left Taps Average	67	115	84

Symbol Digit Coding (SDC)	Score	Standard	Percentile	
Correct Responses	50	80	9	The SDC test measures speed of processing and draw upon several cognitive processes simultaneously, such as visual scanning, visual perception, visual memory, and motor functions. Errors may be due to impulsive responding, misperception, or confusion.
Errors*	0	112	79	
Stroop Test (ST)	Score	Standard	Percentile	
Simple Reaction Time*	246	104	61	The ST measures simple and complex reaction time, inhibition / disinhibition, mental flexibility or directed attention. The ST helps assess how well a subject is able to adapt to rapidly changing and increasingly complex set of directions. Prolonged reaction times indicate cognitive slowing / impairment. Errors may be due to impulsive responding, misperception, or confusion.
Complex Reaction Time Correct*	547	100	50	
Stroop Reaction Time Correct*	785	80	9	
Stroop Commission Errors*	3	70	2	
Shifting Attention Test (SAT)	Score	Standard	Percentile	
Correct Responses	34	54	1	The SAT measures executive function or how well a subject recognizes set shifting (mental flexibility) and abstraction (rules, categories) and manages multiple tasks simultaneously. Subjects have to adjust their responses to randomly changing rules. The best scores are high correct responses, few errors and a short reaction time. Normal subjects may be slow but accurate, or fast but not so accurate. Attention deficit may be apparent.
Errors*	13	75	5	
Correct Reaction Time*	1212	77	6	
Continuous Performance Test (CPT)	Score	Standard	Percentile	
Correct Responses	40	104	61	The CPT measures sustained attention or vigilance and choice reaction time. Most normal subjects obtain near-perfect scores on this test. A long response time may suggest cognitive slowing and/or impairment. More than 2 errors (total) may be clinically significant. More than 4 errors (total) indicate attentional dysfunction.
Omission Errors*	0	104	61	
Commission Errors*	4	40	1	
Choice Reaction Time Correct*	453	83	13	
Reasoning Test (RT)	Score	Standard	Percentile	
Correct Responses	9	87	19	The NVRT measures how well a subject can perceive and understand the meaning of visual or abstract information and recognizing relationships between visual-abstract concepts. The NVRT is comprised of 15 matrices, or visual analogies. The matrices are progressively more difficult. Each is presented for 14.5 seconds. Non-verbal or visual-abstract reasoning is the process of perceiving issues and reaching conclusions through the use of symbols or generalizations rather than concrete factual information.
Average Correct Reaction Time*	4435	104	61	
Commission Errors*	6	81	10	
Omission Errors*	0	115	84

Four Part Continuous Performance Test	Score	Standard	Percentile	The FPCPT test is a four part test that measures a subject's working memory and sustained attention. The FPCPT is a four part test: PART ONE - is a simple reaction time test, the subject must press the space bar when any stimulus is presented; PART TWO - is a variant of the continuous performance test, the subject is asked to respond to one stimulus, but not to any others. Discrimination is required, so the reaction times that are generated are "choice reaction times". PART THREE - is a "one back" CPT. The subject has to respond to a figure only if the figure immediately preceding was the same. PART FOUR - is a "two-back" CPT. It is a difficult task and is used to measure working memory. Parts two, three, and four of the tests are used to calculate sustained attention domain.
Part 1

Adult ADHD Self-Report Scale (ASRS-v1.1) Symptom Checklist	
Patient ID: 39363	Test Date: April 5, 2025 06:32:19
Age: 27	Administrator: Lucid Cognition
Total Test Time: 57:07 (min:secs)	Language: English (United States)
Duration: 2:26 (min:secs)	CNSVS Online Version 2.0.5

The Symptom Checklist is an instrument consisting of the eighteen DSM-IV-TR criteria. Six of the eighteen questions were found to be the most predictive of symptoms consistent with ADHD. These six questions are the basis for the ASRS v1.1 Screener and are also Part A of the Symptom Checklist. Part B of the Symptom Checklist contains the remaining twelve questions.

If four or more marks appear in the darkly shaded boxes within Part A then the patient has symptoms highly consistent with ADHD in adults and further investigation is warranted. The frequency scores on Part B provide additional cues and can serve as further probes into the patient's symptoms. Pay particular attention to marks appearing in the dark shaded boxes. The frequency-based response is more sensitive with certain questions. No total score or diagnostic likelihood is utilized for the twelve questions. It has been found that the six questions in Part A are the most predictive of the disorder and are best for use as a screening instrument.

Part A (questions 1-6)		Never	Rarely	Some times	Often	Very Often
1	How often do you have trouble wrapping up the final details of a project, once the challenging parts have been done?					X
2	How often do you have difficulty getting things in order when you have to do a task that requires organization?				X	
3	How often do you have problems remembering appointments or obligations?			X		
4	When you have a task that requires a lot of thought, how often do you avoid or delay getting started?					X
5	How often do you fidget or squirm with your hands or feet when you have to sit down for a long time?			X		
6	How often do you feel overly active and compelled to do things, like you were driven by a motor?					X

Part B (questions 7-18)		Never	Rarely	Some times	Often	Very Often
7	How often do you make careless mistakes when you have to work on a boring or difficult project?					X
8	How often do you have difficulty keeping your attention when you are doing boring or repetitive work?					X
9	How often do you have difficulty concentrating on what people say to you, even when they are speaking to you directly?					X
10	How often do you misplace or have difficulty finding things at home or at work?					X
11	How often are you distracted by activity or noise around you?					X
12	How often do you leave your seat in meetings or other situations in which you are expected to remain seated?			X		
13	How often do you feel restless or fidgety?				X	
14	How often do you have difficulty unwinding and relaxing when you have time to yourself?				X	
15	How often do you find yourself talking too much when you are in social situations?					X
16	When you're in a conversation, how often do you find yourself finishing the sentences of the people you are talking to, before they can finish them themselves?					X
17	How often do you have difficulty waiting your turn in situations when taking turns is required?					X
18	How often do you interrupt others when they are busy?					X

The Adult ADHD Self-Report Scale (ASRS) Symptom Checklist and scoring system were developed in conjunction with the World Health Organization (WHO), and the Workgroup on Adult ADHD that included the following team of psychiatrists and researchers: Lenard Adler MD, Associate Professor of Psychiatry and Neurology New York University Medical School; Ronald C. Kessler PhD Professor, Department of Health Care Policy Harvard Medical School; Thomas Spencer MD, Associate Professor of Psychiatry Harvard Medical School.

Epworth Sleepiness Scale (ESS) SF-8	
Patient ID: 39363	Test Date: April 5, 2025 06:32:19
Age: 27	Administrator: Lucid Cognition
Total Test Time: 57:07 (min:secs)	Language: English (United States)
Duration: 1:55 (min:secs)	CNSVS Online Version 2.0.5

The patient is getting enough sleep if they score 6 or less. Scores of 7 or 8 are average. If the patient's score is 9 or more they should seek the advice of a sleep specialist without delay.

In contrast to feeling just tired, how likely are you to doze off or fall asleep in the following situation?		
1	Sitting and reading	1 - Slight chance of dozing
2	Watching TV	1 - Slight chance of dozing
3	Sitting inactive in a public place (e.g., a theater or a meeting)	2 - Moderate chance of dozing
4	As a passenger in a car for an hour without a break	1 - Slight chance of dozing
5	Lying down to rest in the afternoon when circumstances permit	2 - Moderate chance of dozing
6	Sitting and talking to someone	0 - No chance of dozing
7	Sitting quietly after a lunch without alcohol	1 - Slight chance of dozing
8	In a car, while stopped for a few minutes in traffic	0 - No chance of dozing
Epworth Score		8

NeuroPsych Questionnaire (NPQ) LF-207	
Patient ID: 39363	Test Date: April 5, 2025 06:32:19
Age: 27	Administrator: Lucid Cognition
Total Test Time: 57:07 (min:secs)	Language: English (United States)
Duration: 16:11 (min:secs)	CNSVS Online Version 2.0.5

Domain	Score	Severity	Description
Attention	300	Severe	The Neuropsych Questionnaire asks patients (or an appropriate observer) a series of questions about their clinical state. The questions are about the symptoms of various neuropsychiatric disorders. The terminology is similar to that used in the diagnostic manuals, and in many familiar clinical questionnaires and rating scales; but it has been simplified, and all symptoms are scored on the same metric. Scores are reported on a scale of 0 (not a problem) to 300 (severe). As a rule, scores above 225 indicate a severe problem; scores from 150-224 indicate a moderate problem; and scores from 75-149, a mild problem. A high score on the Neuropsych Questionnaire means that the patient is reporting more symptoms of greater intensity. It doesn't necessarily mean that the patient has a particular condition; just that he or she (or their spouse, parent or caregiver) is saying that they have a lot of intense symptoms. Conversely, a low score simply means that the patient (or caregiver) is not reporting symptoms associated with a particular condition, at least during the period of time specified. It does not mean that the patient does not have the condition. Just as some people over-state their problems, others tend to under-state their problems. The Neuropsych Questionnaire is not a diagnostic instrument. The results it generates are only meant to be interpreted by an experienced clinician in the course of a clinical examination.

Attention Questions		
1	Difficulty concentrating	3 - A severe problem
2	Difficulty paying attention	3 - A severe problem
3	Easily distracted	3 - A severe problem
4	Feeling scattered, disorganized	3 - A severe problem
5	Forgetful, I need constant reminding	3 - A severe problem
6	Leaving things behind and having to go back to get them.	3 - A severe problem
7	Losing things	3 - A severe problem
8	Making careless mistakes	3 - A severe problem
9	Not finishing chores, homework or projects	3 - A severe problem
10	Short attention span	3 - A severe problem
11	When reading, losing track of what the story is about	3 - A severe problem
Impulsive Questions		
1	Feeling restless	2 - A moderate problem
2	Fidgety, I can't sit still	3 - A severe problem
3	High energy	2 - A moderate problem
4	Impatient	3 - A severe problem
5	Impulsive, act without thinking	3 - A severe problem
6	Overly active	2 - A moderate problem

NeuroPsych Questionnaire (NPQ) LF-207	
Patient ID: 39363	Test Date: April 5, 2025 06:32:19
Age: 27	Administrator: Lucid Cognition
Total Test Time: 57:07 (min:secs)	Language: English (United States)
Duration: 16:11 (min:secs)	CNSVS Online Version 2.0.5

Learning Questions		
1	Bad handwriting	2 - A moderate problem
2	Having to do things slowly to make sure it's right	3 - A severe problem
3	Learning a foreign language	2 - A moderate problem
4	Learning math	3 - A severe problem
5	Learning new things	3 - A severe problem
6	I don't like to read	3 - A severe problem
7	I don't work up to my potential	2 - A moderate problem
8	Organizing studies or projects	2 - A moderate problem
9	Paying attention to lectures	3 - A severe problem
10	Remembering what you studied or read	3 - A severe problem
11	Taking notes	3 - A severe problem
12	Taking tests	3 - A severe problem
13	When reading, losing track of what the story is about	3 - A severe problem
Memory Questions		
1	Failing to recognize places you have been before.	2 - A moderate problem
2	Finding a television story or a movie hard to follow.	3 - A severe problem
3	Forgetful, I need constant reminding	3 - A severe problem
4	Forgetting appointments or social engagements.	2 - A moderate problem
5	Forgetting if you have taken your medicine	1 - A mild problem
6	Forgetting something cooking on the stove or in the toaster	0 - Not a problem
7	Forgetting to do something you said you would do	3 - A severe problem
8	Forgetting to give a message to someone	3 - A severe problem
9	Forgetting to tell somebody something that you meant to tell them	2 - A moderate problem
10	Forgetting where things are kept; looking for them in the wrong place	3 - A severe problem
11	Forgetting where you parked the car	3 - A severe problem
12	Going to the store but forgetting to get what you need	2 - A moderate problem
13	I can't remember the names of close relatives or friends.	0 - Not a problem
14	Learning new things	3 - A severe problem
15	Leaving things behind and having to go back to get them.	3 - A severe problem
16	My mind goes blank	3 - A severe problem
17	Problems with memory	3 - A severe problem
18	Putting something down and then forgetting where you put it.	3 - A severe problem
19	Reading something and then realizing you have read it before.	3 - A severe problem
20	Trouble thinking of the right word	3 - A severe problem
21	Unable to remember things as well as I used to	0 - Not a problem
22	When reading, losing track of what the story is about	3 - A severe problem
Anxiety Questions		
1	Feeling anxious	3 - A severe problem
2	Feeling keyed up or on edge	2 - A moderate problem
3	Feeling nervous	2 - A moderate problem
4	Feeling restless	2 - A moderate problem
5	Feeling tense	2 - A moderate problem
6	Fidgety, I can't sit still	3 - A severe problem
7	Having nightmares or bad dreams	2 - A moderate problem
8	High-strung or keyed up	1 - A mild problem
9	I find it hard to relax	2 - A moderate problem
10	Worrying too much	3 - A severe problem
Panic Questions		
1	Attacks of intense anxiety	1 - A mild problem
2	Feeling so nervous it's hard to breathe	2 - A moderate problem
3	Getting so nervous I feel like passing out	1 - A mild problem
4	Getting really scared for no reason at all	2 - A moderate problem
5	Panic attacks	1 - A mild problem
6	Trouble catching my breath	0 - Not a problem

Agoraphobia Questions		
1	Avoiding certain things or places	3 - A severe problem
2	Feeling scared in open spaces or out in public	3 - A severe problem
3	Feeling scared to use buses or trains	3 - A severe problem
4	Feeling uncomfortable in crowds	3 - A severe problem
5	Feelings of being trapped	2 - A moderate problem
6	Worrying about fainting in public	0 - Not a problem
Obsessions & Compulsions Questions		
1	I hate being touched or held	2 - A moderate problem
2	Checking things several times	3 - A severe problem
3	Collecting things that you don't really need	3 - A severe problem
4	Counting things; numbers going through your mind	2 - A moderate problem
5	Eating the same foods all the time	3 - A severe problem
6	Feeling guilty over minor infractions	3 - A severe problem
7	Having bad thoughts that you can't get rid of	2 - A moderate problem
8	Having thoughts or words that go over and over in your mind	3 - A severe problem
9	It bothers me when someone eats off my plate	1 - A mild problem
10	I have a special number that I count up to or do things just that number of times	0 - Not a problem
11	I have to do things a certain number of times before I'm satisfied	1 - A mild problem
12	Moving or talking in special ways to avoid bad luck	2 - A moderate problem
13	Putting things away, and they have to be just right	2 - A moderate problem
14	Repetitive behaviors like touching or counting	2 - A moderate problem
15	Thoughts about sex that are troubling	0 - Not a problem
16	Trouble making up your mind	2 - A moderate problem
17	Washing your hands over and over	1 - A mild problem
18	Worrying about being clean	1 - A mild problem
19	Worrying about the germs that are on things	1 - A mild problem
Social Anxiety Questions		
1	I am a shy person	2 - A moderate problem
2	Difficulty developing friendships	2 - A moderate problem
3	Feeling nervous around people I don't know	2 - A moderate problem
4	Feeling nervous when I have to do something in front of people	3 - A severe problem
5	Feeling uneasy about eating or drinking in public	1 - A mild problem
6	Hard to go out in public	3 - A severe problem
7	Hard to relate to other people	2 - A moderate problem
8	Starting a conversation with people I don't know	1 - A mild problem
Depression Questions		
1	Crying spells	1 - A mild problem
2	Feeling depressed	2 - A moderate problem
3	Feeling discouraged about the future	3 - A severe problem
4	Feeling empty inside	1 - A mild problem
5	Feeling hopeless	1 - A mild problem
6	Feeling irritable	1 - A mild problem
7	Feeling little or no interest in things	2 - A moderate problem
8	Feeling lonely	2 - A moderate problem
9	Feeling sad	2 - A moderate problem
10	Feeling that doing anything is a real effort	3 - A severe problem
11	Feelings of guilt or remorse	1 - A mild problem
12	Having nightmares or bad dreams	2 - A moderate problem
13	I feel like a failure	1 - A mild problem
14	I feel like I'm being punished	2 - A moderate problem
15	Loss of interest in sex	2 - A moderate problem
16	Not enjoying things as much as before	2 - A moderate problem
17	Withdrawn, isolated	1 - A mild problem

Mood Stability Questions		
1	Anger	1 - A mild problem
2	Angry outbursts	1 - A mild problem
3	Crying spells	1 - A mild problem
4	Easily agitated	1 - A mild problem
5	Easily annoyed	2 - A moderate problem
6	Easily frustrated	2 - A moderate problem
7	Elevated mood, euphoria	3 - A severe problem
8	Excitable	2 - A moderate problem
9	Explosive	1 - A mild problem
10	Feeling irritable	1 - A mild problem
11	Feeling negative	2 - A moderate problem
12	My moods change quickly	1 - A mild problem
13	Temper tantrums	1 - A mild problem
Mania Questions		
1	Much more interested in sex than usual	2 - A moderate problem
2	Being much more social or outgoing than usual	3 - A severe problem
3	Decreased need for sleep	3 - A severe problem
4	Feeling much more confident than usual	3 - A severe problem
5	Having much more energy than usual	2 - A moderate problem
6	Increased or inappropriate sexual interest	0 - Not a problem
7	Pressured speech, uninterruptible and continuous	2 - A moderate problem
8	Thoughts racing	3 - A severe problem
Aggression Questions		
1	Blaming other people for your own mistakes	2 - A moderate problem
2	Defiant or argumentative	2 - A moderate problem
3	Destructive to property or things	0 - Not a problem
4	Excessive yelling or screaming	2 - A moderate problem
5	Getting into fights	2 - A moderate problem
6	Having an urge to injure or to hurt someone	0 - Not a problem
7	Having the urge to destroy things	1 - A mild problem
8	Hostile	0 - Not a problem
9	In trouble with the law	0 - Not a problem
10	Physical aggression toward others	1 - A mild problem
Psychotic Questions		
1	I feel nervous when people watch me or talk about me	3 - A severe problem
2	Feeling paranoid	2 - A moderate problem
3	I feel that other people are watching or talking about me	3 - A severe problem
4	I feel that someone else can control my mind	0 - Not a problem
5	I feel that I can't trust other people	2 - A moderate problem
6	I feel I am being watched	0 - Not a problem
7	I hear voices that no one else can hear	0 - Not a problem
8	I can't think straight	3 - A severe problem
9	My mind is full of terrifying thoughts or images	3 - A severe problem
10	Other people know my private thoughts	0 - Not a problem
11	Overly suspicious	2 - A moderate problem
12	Peculiar or bizarre behavior	1 - A mild problem
13	Seeing things that other people don't see	0 - Not a problem
14	I can't feel close to another person	2 - A moderate problem
